

MUHAMMAD AHMAD FASEEH

Software Engineer — Python / FastAPI · Docker · Full-Stack (Node.js, React)

0320-6493816 | muhammadahmadfaseeh5@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer with hands-on experience building scalable backend services in **Python (FastAPI)**, Node.js, and NextJS, and interactive front-ends in React.js. Skilled in containerizing and deploying applications with Docker, designing RESTful & GraphQL APIs, and writing clean, readable, reusable, and well-documented code. Strong analytical reasoning for debugging complex systems, optimizing performance, and evaluating architectural trade-offs. Comfortable working cross-functionally, producing clear technical write-ups and rationale for engineering decisions, with additional experience integrating AI-driven features (chatbots) and automating data-heavy workflows.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (ES6+), TypeScript, SQL (PostgreSQL, MySQL), PHP, HTML/CSS, C++
- **Backend:** Python, FastAPI, Node.js, Express, NestJS, REST APIs, GraphQL, JWT/OAuth Authentication
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, GSAP
- **Databases:** PostgreSQL, MySQL, MongoDB, Vector Databases, Firebase
- **Cloud & DevOps:** Docker, Docker Compose, Containerized Deployments, Git/GitHub, Vercel, Cloudflare, Redis Caching, CI-style Deployment Workflows
- **Practices:** Clean Architecture, Code Review, Technical Documentation, Performance Benchmarking, Debugging & Root-Cause Analysis, Agile Collaboration

EXPERIENCE

Software Engineer & Full Stack Developer

IT KUMAIL

Jul 2025 – Present

Lahore, Punjab

- Design, develop, and maintain efficient, high-quality, reusable code in **Python**, TypeScript, and Node.js, applying clean architecture principles (layered services, repositories, DTOs) for long-term maintainability.
- Build high-performance RESTful APIs using **FastAPI** and Express, with JWT/OAuth authentication, complex business logic, and asynchronous workflows across multiple SaaS products.
- Developed and integrated **FastAPI-based services within the company's CRM system**, building data-processing endpoints and connecting CRM backend logic with the broader SaaS ecosystem.
- **Containerized services with Docker** — writing Dockerfiles and Docker Compose configurations — and deployed to Vercel/Cloudflare, ensuring consistent, reliable environments across development and production.
- Benchmark and continuously optimize backend and API response performance through real-time server health monitoring, load testing, and query optimization on PostgreSQL, translating results into concrete engineering improvements.
- Evaluate and document trade-offs between competing technical approaches (schema design, caching strategy, concurrency handling), producing clear written rationale for architectural decisions shared with the team.
- Integrate automated payment systems (Stripe & PayPal), managing subscription lifecycles, webhooks, retry logic, and secure transaction flows.

WordPress & Front-End Developer

IT KUMAIL

Jul 2025 – March 2026

Lahore, Punjab

- Developed interactive UI components using React.JS and GSAP, and integrated an AI-powered chatbot to automate visitor query handling gaining direct exposure to deploying and refining AI-driven product features.
- Diagnosed and resolved bugs, security vulnerabilities, and performance issues through systematic root-cause analysis across live web applications, including query optimization and caching (Redis).
- Customized back-end logic and integrated third-party APIs to extend application functionality, ensuring readable and maintainable code across the stack.
- Optimized large-scale applications for Core Web Vitals, achieving high Lighthouse scores through advanced caching, lazy loading, and render-blocking resolution.

Freelance Web Developer

Upwork

Feb 2025 – Jul 2025

Remote

- Delivered multiple client projects spanning JavaScript/Typescript web application development, RESTful API integrations, and custom React front-ends for international clients.

PROJECTS

AI-Driven Agentic SaaS Ecosystem | Python, Node.js, Typescript, Express, FastAPI, LangChain, CrewAI, RAG, Embedding

- Building a comprehensive SAAS back-end in **Python** that automates workflows using n8n and the Gemini/Open AI APIs, with Lang Chain- and Crew AI-based agentic routing and Flowise orchestration.
- Implementing vector-based retrieval (RAG) with vector databases and LlamaIndex, integrated with MongoDB and a Shopify CRM connector for real-world business automation.

Cerahi Dentistry | *Next.js, Node.js, TypeScript, PostgreSQL*

- Built a precision dental instruments catalog and business platform, listing and showcasing surgical/dental tools with a robust PostgreSQL backend and a clean REST API layer.
- Cerahi Surgical** | *Next.js, TypeScript, Tailwind CSS, MongoDB*
- Built a high-end, responsive online catalog and business platform for a premium surgical instruments manufacturer, featuring advanced search, recharts-driven analytics, and Redux Toolkit state management.
- To The Web Pro** | *React.JS, Tailwind CSS, Node.js, MongoDB*
- Built a comprehensive SEO utilities and web developer tools platform (meta tag checker, speed test tools, custom workflow aids) with an API-integrated Node.JS/MongoDB backend.
- Cerahi TSG** | *React.js, Tailwind CSS, Stripe, Redux Toolkit*
- Developed a dynamic sportswear and apparel e-commerce showcase platform with Stripe-powered cart workflows, fluid animations (GSAP, Framer Motion), and interactive brand storytelling.

EDUCATION

Bachelor of Science in Software Engineering
PMAS Arid Agriculture University

Oct 2023 – Present
Lahore, Punjab

Intermediate in Computer Science (ICS)
Superior College

Sep 2021 – Jun 2023
Piplan
